

**Chrome extension:**

A chrome extension needs to be built that does the following:

When a webpage loads, if the title or meta description (see note at the bottom) has the word 'videos', redirect the webpage to '<https://www.google.com>'

Note:

1. Title of a page has the html tag <title>
2. Meta description of a page has the html tag <meta name="description">

**Sending us your code**

In order to share your code, use <https://bitbucket.org/> or Github. Create a separate PRIVATE repository and share it with our email ID: [contact@funswitch.io](mailto:contact@funswitch.io). If you're sharing on Github, share it with our user ID: 'contact-fs'. If you have any questions, call +91-80956 39038.
